Risk management

Being internationally active, the CPH Group is exposed to various financial and non-financial risks that are inseparably linked with its business activities. These risks are defined in the broadest sense as the danger that financial, operational or strategic objectives may not be achieved as planned. To ensure the Group's long-term success, therefore, it is essential to effectively identify such risks, to analyze them and to eliminate or reduce them through appropriate steering and management actions.

Assessment of significant risks at the end of 2021

The significant risks identified for the CPH Group as of the end of 2021 included the COVID-19 pandemic and its impact on sales markets and demand, the changes to economic growth, political and economic uncertainties, Swiss franc/euro currency trends and paper price developments. Actions have been defined to reduce these and other risks, and such actions are being taken in close coordination with the strategic objectives of the Group and its three divisions.

Financial risk management (see table on Page 31)

By virtue of its business activities, the CPH Group is particularly exposed to financial risks such as currency risks, credit risks, liquidity risks and interest rate risks. Its overarching risk management is focused on the unforeseeability of developments on the financial markets, and is geared to minimizing any potential negative impact thereof on the Group's financial health. Risk management is performed by the Group's Finance Department, in accordance with the guidelines

approved by the Board of Directors. These specify the use of derivatives and the handling of currency risks, interest rate risks and credit risks. The Board's guidelines are binding for all group member companies. The table below provides an overview of the financial risks, together with their description and their management.

Financial and operational risk management are conducted within the Group in accordance with the principles and the guidelines laid down by the Board of Directors and Group Executive Management. The group and statutory auditors support the Board of Directors and its Finance & Auditing Committee by verifying the existence of the Group's internal control system (ICS) in the course of their performance of their legal mandate.

Risk management principles

The Group's risk management principles guide the regular assessment of operational and strategic business risks, the hedging of currency, interest rate, credit and liquidity risks and the internal control system (ICS). Guidelines have also been established for the management of liquid funds and for loan procurement activities.

Risk overview

The regularly identified and analyzed risks are summarized in an annual Risk Report which is submitted to the Board of Directors. The significant business risks are also defined in a detailed risk catalogue and a risk matrix, and are assessed in terms of their likelihood of occurrence and the scope of the damage they could cause. Insurance coverage is also annually appraised.

Reporting

The Group's risk management is reported on annually. Strategic and operational risks are recorded. Any extraordinary incidents are reported immediately to the Board of Directors. In the Board's opinion, with the risk management established, the actions required have been taken to ensure the CPH Group's future development, although the possibility can never be excluded of unforeseen risks arising as a result of special circumstances or uncertainties.
